## Trade Operations Specialist

### Job Description

We are seeking a skilled Trade Operations Specialist with expertise in MT4, MT5, cTrader, OneZero, and PrimeXM platforms. The ideal candidate will have at least 1 year of experience working with a CFD broker and possess a degree in Mathematics and Statistics. Additionally, proficiency in Python programming is required. As a Trade Operations Specialist, you will be responsible for executing and monitoring trades, managing trading platforms, and ensuring smooth trade operations.

### Responsibilities:

#### Trade Execution and Monitoring:

- Execute trades on various platforms, including MT4, MT5, cTrader, OneZero, and PrimeXM.
- Monitor trade activity, ensuring accurate and timely execution.
- Analyze trade performance and provide recommendations for improvements.
- Manage trade-related issues and resolve them promptly.

#### Platform Management:

- Manage and maintain trading platforms, including configuration, setup, and updates.
- Ensure platform stability and reliability, minimizing downtime.
- Collaborate with IT teams to address technical issues and implement enhancements.
- Stay up-to-date with platform advancements and new features.

#### Risk Management:

- Implement risk management procedures and protocols to mitigate trading risks.
- Monitor and manage trading limits, margin requirements, and exposure.
- Collaborate with compliance teams to ensure adherence to regulatory requirements.
- Identify potential risk areas and propose risk mitigation strategies.

#### Data Analysis and Reporting:

- Analyze trade data, market trends, and performance metrics.
- Generate reports on trade activity, volumes, and profitability.
- Provide insights and recommendations based on data analysis.
- Collaborate with stakeholders to optimize trade strategies and improve performance.

#### Process Improvement:

- Identify opportunities for process improvement and automation.
- Develop and implement efficient workflows and procedures.
- Streamline trade operations to enhance productivity and accuracy.
- Collaborate with cross-functional teams to drive operational excellence.

### Qualifications:

- Bachelor's degree in Mathematics, Statistics, or a related field.
- Minimum of 1 year of experience working with a CFD broker, specializing in trade operations.
- Strong knowledge and experience in working with MT4, MT5, cTrader, OneZero, and PrimeXM platforms.

- Proficiency in Python programming for data analysis and automation.
- Solid understanding of trading concepts, order types, and execution methods.
- Familiarity with risk management principles and regulatory requirements in the financial industry.
- Strong analytical and problem-solving skills.
- Excellent attention to detail and accuracy.
- Effective communication and interpersonal skills.
- Ability to work in a fast-paced and dynamic environment.
- Preferred Qualifications:
  - Professional certifications related to trading operations (e.g., CMT, CFA).
  - Experience with other trading platforms and technologies.
  - Knowledge of financial markets and instruments.
  - Familiarity with SQL or other database query languages.

Join our dynamic team and contribute to the success of our trade operations. Apply now to showcase your skills in trade execution, platform management, and data analysis while working with cutting-edge technologies.
